COMPLIANCESERVICES

Newsletter n. 4 • October 2025

Welcome to the #ComplianceServices project's fourth newsletter!

The Compliance Services project brings the latest news and updates on changes in the EU energy labelling and ecodesign regulations – mainly in the field of heating, air conditioning, PV products, smartphones & slate tablets and white goods (e.g. tumble dryers).

In this edition of the newsletter, we provide you with links to our latest documents on local space heaters and give an update on smartphones and slate tablets

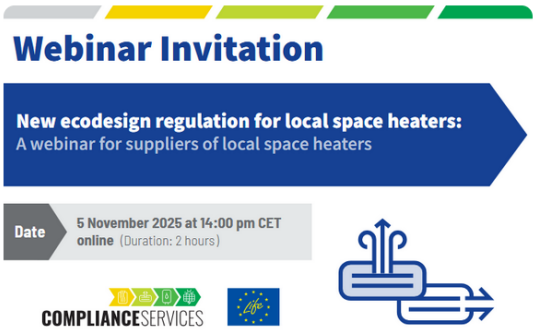
Local space heaters

Are you **a supplier of local space heaters?**

- We invite you to register and attend a **webinar** on new ecodesign requirements for local space heaters, that will take place on 5th of November at 14:00 pm CET.
  The ecodesign regulation for local space heaters was updated in 2024 with new requirements, which apply for products placed on the market from the 1st of July 2025 onwards, except for provisions on circumvention, which have been applicable since the 9th of May 2024.

- The Compliance Services project webinar on ecodesign requirements for local space heaters is relevant for suppliers and will provide the participants with an overview of the requirements, including clarification of any potential grey areas.

More information: https://www.product-compliance-services.eu/suppliers/webinars-e-learning/webinar-local-space-heaters-5-11-25
Registration: https://register.gotowebinar.com/#register/5187819566652676439



- **Guidelines** for suppliers on local space heaters: Most new ecodesign provisions on local space heaters apply from the 1st of July 2025. What exactly are they about and what should the suppliers be aware about? Our new guidelines provide an overview of the requirements, of changes compared to the previous legislation and its scope, as well as e.g. a list of spare parts to be made available, frequently spotted issues in market surveillance checks, etc.

The document is available in English language online here: Quick Guide: Local Space Heaters - Compliance Services and will soon be available in other languages as well.

Smartphones and tablets

- **New energy labels and ecodesign requirements for smartphones and tablets**

Find here the full presentation and Q&A document from a webinar for dealers of smartphones and tablets, explaining dealers' obligations, timeline, obligations of suppliers towards dealers, the content of energy label and product information sheet and how they shall be presented in different sales channels to consumers:

Visit our project website!

- The Compliance Services project website contains a wide range of information for suppliers, dealers and other professional stakeholders on energy labelling and ecodesign requirements, focusing both on selected general requirements, and on the product categories with recent changes in the respective regulations, mainly tumble dryers, smartphones/slate tablets and local space heaters.

The website is available in English, with information also being provided in Czech, Danish, French, German, Italian, and Portuguese.

Do you have a question? Feel free to ask!

Please, let us know, if you have a question regarding the new energy labelling and ecodesign requirements. Let us know what type of stakeholder you are and what product category you are interested in. We will provide you with the respective information. Please, put your question here: Compliance Service Desk Steps - Compliance Services

More to come!

Are you a supplier, retailer, or installer dealing with some of the product categories subject to new energy labelling or ecodesign requirements? Our project can help you by means of the following services:

- E-learning courses
- Product specific webinars
- Guidelines, FAQs and factsheets
- An opportunity to consult experts with specific individual questions

Stay in contact!

Please, follow us for more upcoming news about the new #ComplianceServices project to learn about the upcoming changes to the energy labelling and ecodesign policies!
